---

PROFILE

Responsible and enthusiastic student with experience in technical and team-based projects. Skilled in communication, organization, and problem-solving, with a strong desire to grow professionally.
Graduated from the top mathematics school in the country with honors (medal recipient) and currently studying Computer Science at a leading university, where I've strengthened my programming and software development skills. I've successfully worked on several team projects, both academically and professionally, and completed freelance work delivering real-world solutions to clients. These experiences have developed my technical, time management, and collaboration skills. I am looking forward to applying my skills, learning from experienced professionals, and making a meaningful contribution to a dynamic and innovative team.
